6th World Veterinary Orthopedic Congress &
49th Annual Veterinary Orthopedic Society Conference

Feb 5-12, 2022 at Snowmass, Colorado

CALL FOR ABSTRACTS

We invite practitioners, students, interns, residents, academicians, and researchers interested in large animal, small animal, and exotic species, to submit abstracts of novel studies in practical and scientific topics related to veterinary orthopedics and traumatology, diversity in the veterinary surgical field, business and ethics topics relating to veterinary surgery, and environmental topics relating to veterinary surgery. Preference will be given to abstracts that have clinical relevance. Papers addressing results of controlled retrospective and prospective clinical studies are strongly encouraged. Clinician investigators should also consider submitting innovative surgical techniques, or case reports describing unusual or difficult cases as these will be reviewed separate from the scientific abstracts. Presentations will be limited to 10 minutes and followed by 5 minutes of questions/discussion. Posters must fit within the 4’ (height) x 4’ (width) area provided.

Call for papers will open on July 15th, 2021 and close on October 15th, 2021 for both podium presentations and posters. See the link on the VOS website: www.vosdvm.org for full details of abstract submission, formatting and regulations.

Submission categories will be:

- Clinical/Scientific Studies
- Case reports: a maximum of three novel or interesting cases

The Mark S. Bloomberg Memorial Resident Research Award was established to recognize outstanding resident abstract submissions to the scientific program. At least one recipient and up to seven recipients per year will be awarded up to $1500.00 towards expenses to attend and present their abstract at our annual meeting. Only individuals currently in a residency training program or within 2 years of completion of a formal residency program are eligible. The abstract submission may only be of studies conducted during the residency program. All abstracts being submitted for consideration of this award must indicate so on the online submission form.

The Student/Intern Research Award was established to recognize outstanding student or intern abstract submissions to the scientific program. Up to two recipients will be awarded (depending on abstract quality) up to $1500.00 towards expenses to attend and present their abstract at our annual meeting. Only individuals currently in a DVM or Intern training program or within 1 year of completion of a formal internship or DVM program are eligible. The work must be performed as a student or intern. All abstracts being submitted for consideration of this award must indicate so on the online submission form.
