Overview of activities in 2021

Making first step (Confirming WOW Group, systems, governance, etc)

Lectures in WSAVA Conference 2021
Session Name: WSAVA Oncology Working Group - session 03 and 04 (Session Date & Time (CET): 15 November)

Global Oncology Survey Cooperation with Journals: JSAP Article Summaries
Slides Fast facts

Glossary (Translation to French, Italian, Spanish, Catalan and 10 languages)

PR, Bulletin, Social media (numerous posts), Dedicated email to member reps and committees, Potential Facebook Tags
BSAVA, Wiley Veterinary Medicine

Plans and priorities for 2022

The WOW Group is one of the WSAVA’s newest committees and is working hard to create resources to raise awareness of the latest thinking in cancer therapy and to promote best practice globally.

In January 2022, it launched an ‘Oncology Glossary’. With cancer such a complex disease, the Glossary aims to help owners discuss their care with their veterinarian from a more informed perspective. It is available more than 15 languages.

Committee members also wrote summaries of 12 oncology-focused articles in the Journal of Small Animal Practice, the WSAVA’s official scientific journal.

The WOW team is now focused on creating additional educational resources, including a Fast Facts Series and an oncology surgery checklist.

Committee Chair Dr Martin Soberano hosted a WSAVA webinar in Spanish in March and it is hoped that a WSAVA webinar in English will take place later in 2022.

Visit the WSAVA website to review them (and all other resources available)
