CHAIR CSC
Dr Guillermine Manigot

MEMBERS
Dr Daphne Westgeest
Dr Gopinathan Gangadharan
Dr Natalie Lloyd
Dr Lisa Mestrinho
The Committee conducted numerous Zoom meetings to work on assigned tasks and has been actively involved in generating a regional congress with a localized impact, providing an alternative option for countries unable to host a larger congress or preferring a reduced format for the event.

During the Peru 2022 Congress, the committee chair participated in several meetings with other Committee chairs, the EB and the PCO, to evaluate and potentially modify the Congress structure and bidding process.

The CSC has been tasked with preparing a report for the EB, which includes innovative and renovated ideas for the Congress structure and selection of Congress sites. Over time, many of these documents have been edited, simplified, and rewritten. The bidding process has also undergone review, with suggestions being made.

These adjustments are a response to the challenges faced by the community during and after the pandemics and the war.

The CSC has already initiated preliminary discussions with the executive board regarding the future direction of the World Congress. We are exploring all possibilities to provide outstanding continuing education opportunities to the maximum number of WSAVA members.

The primary focus for the upcoming year will be to review the future direction of the World Congress and related continuing education events. Additionally, we will collaborate closely with the CEC and the SC to ensure a productive and fulfilling Congress experience for our delegates.
